NOTE: This document contains a source that is debunked in an article called “[Disrupt Deceive Deter Destroy: Panquake Under Attack](#)”. The attached pages contain targeted attacks and smears against Suzie Dawson and the [Panquake](#) project. Please read the excerpt below before continuing to the outlandish smear piece by Pamela Drew, which starts on Page 2 of this document.

This cover page is necessary because trolls are so lazy and incompetent that they link directly to Pamela Drew’s debunked writings on Suzie Dawson’s website and present them as evidence.

Excerpt from Suzie Dawson’s response to Pamela Drew’s smears:

“I have been sent a .pdf [attached] of what purports to be a research article about me that has been sent to my project Panquake’s endorsers, donors, supporters and friends. **It is packed full of audacious lies about me. I say audacious, because the most rudimentary research of my publicly available work shows up every single claim to be false.** I’m not kidding. Every single claim is false. This means the smear merchants are relying on people’s laziness or people being sufficiently off-put by the negative energy of the document to not investigate further for themselves or to simply distance themselves from me to avoid a time-sink as it is less hassle than probing further.

The primary smear is that I was never targeted in New Zealand and am merely masquerading as a journalist or activist. Ironically, the fact that I’m being so voraciously smeared is in and of itself evidence that I am being targeted.” - Suzie Dawson

Suzi Dawson's PanQuake Changes Everything

Investigation by Pamela Drew

Pamela Drew has decades of experience with politics and toxic policy. She Interned for Hon. Otis Pike, Chair House Intelligence, was Beltway Bandit winning computer network contracts in Reagan years. Her blog at Newsvine and documentary film *Roundup Ready Nation* about gmo food earned her a spot on Wall Street Journal's 2007 list of Internet influencers. From 2011 to 2018 she produced the Walkey nominated, Loraxlive Anonymous radio show and served as Vice President for FreeAnons supporting prosecuted and jailed hacktivists and whistleblowers. Her passion for direct action is reflected in 15,000+ Flickr pictures from Day One Occupy NYC through BLM 2020 protests with many in between.

Suzi Dawson's PanQuake Raises the Stakes

Several weeks ago Suzi launched a fund raising campaign for a Blockchain social media concept. She claims to have dreamed this up four months earlier and has pitched it as Julian's Dream. PanQuake features an impressive list of Assange supporters whose names are leveraged to promote the funding campaign. The original goal of \$65,000 was quickly met and has been raised to \$167,000 target using this endorsement strategy.

The PanQuake idea is not new and follows a legacy of fraud and

disinformation the *Person of Interest*, persecuted journalist legacy is built on. Every successful Ponzi scheme relies on misplaced trust and unchecked facts. This tries to correct that.

Alternatives to Twitter and Facebook are desperately needed and Blockchain technology is the way to build it. Approximately two years, 47,000 hours of coding and one million dollars has already been invested to make it a functioning reality at social media start-up SoMee. Unlike PanQuake joining SoMee is free.

<https://somee.social/profile/pamela-drew/timeline>

Very hard to believe Suzi is unaware of this since so much PanQuake launch material looks to be lifted from SoMee Youtube tutorials. Suzi also knows founding members, one did a long form interview with her at We Are Change that is featured on Dawson's list of media coverage for her asylum bid.

Please note the **April 2019** date for SoMee's Youtube tutorial.

Kiwi Activist Lyn Ny: "It Is Deadly Dangerous To Speak Against The Government"

Posted on November 26, 2016 by Occupy Savvy

Occupy Auckland media team member Suzie Dawson recently went public about her application for temporary asylum in Russia. The Kiwi journalist's documentary '*Diary of a Person of Interest*' details how she has been targeted by the New Zealand and United States governments, leading to her becoming exiled from her home country.

In an interview last week, two eye-witnesses to the targeting of Suzie, the media team co-ordinator Redstar309z and Internet Party of New Zealand candidate Chris Yong, spoke out alongside Suzie to verify her claims.

According to Suzi Dawson her introduction to activism and

journalism was with the Occupy Wall Street movement.
Hundreds of times she has repeated the claim that her targeting began as a member of the Occupy Auckland Media Team.

According to Occupy Auckland Suzi wasn't on the media team.

"There's Penny Bright - SIS Informant".

The FACTS are, that I was one of 12 people responsible for organising

One person who was part of the Occupy Auckland Media and Communications was lifelong activist Penny Bright who did become a target but it was Suzi Dawson launching the attacks. Penny Bright is a lifelong Auckland activist with over 33 protest arrests under her belt. She was one of the original organizers for Occupy Auckland and candidate for Auckland Mayor.

Anonymous Hackers Target Alleged WikiLeaks Bradley Manning's Jailers

Covering the world of data security, privacy and hacker culture.

This article is more than 9 years old.

The emblem of hacker group Anonymous and Bradley Manning (right)

As army private Bradley Manning suffers for his alleged megadeals of secret documents to WikiLeaks, one group of hackers seems determined to make sure that others feel his pain.

Over the weekend, the loose hacker collective Anonymous declared that it will go on the offensive against those who are currently detaining Manning in a Quantico military brig, keeping him in solitary confinement and forcing him to strip nightly and stand at attention naked each morning.

Anonymous calls for PayPal boycott

Hacker group urges users via Twitter to end relationship with payments provider after learning U.S. prosecutors looking to jail 20-year-old for her alleged role in taking PayPal's blog offline last year.

Hacker group Anonymous has struck PayPal again, this time by urging its followers to empty their accounts and stop using the payments provider's services following news that U.S. prosecutors are looking to imprison a university student involved in the denial-of-service attacks on the company's blog last year.

Anonymous, together with its effect, issued a [press release](#) Wednesday urging PayPal users to close their accounts immediately and consider an alternative. "This proves to PayPal's willingness to 'fold to legislation' as proof that it doesn't deserve its customers and the business they give to the payments providers."

Hackers attack spy site

By Russell Blackstock

5:30 AM Sunday Aug 25, 2013

Worldwide activist group Anonymous is believed to be behind a hack attack on the Government Communications Security Bureau website on Friday.

On Thursday, Anonymous posted a threatening video on YouTube, claiming that Prime Minister John Key, the Act Party and veteran politician Peter Dunne were to be held responsible for the destruction of internet freedom and basic human rights of New Zealand citizens by passing the GCSB bill, "which allows your government to spy on you".

The YouTube video.

The Obama Admin didn't deploy the assault tactics Suzi supposedly endured against Violet Blue, despite Violet cited as the best journalistic source by OpLastResort hackers. This Op retaliated for Aaron Swartz death and had charges against Laurie Love and Adam Bennett aka Lorax for alleged involvement. Nothing happened to Chris Hedges for his NDAA lawsuit or Alexa O'Brien who was a named plaintiff for Stratfor Gfiles with Alexa's pre-Occupy work forming USDOR and a plot to invent a connection to Al Qaeda to use terrorism laws against her. Despite all that Alexa was able to cover the Manning Trial

unmolested. Kevin Gozstola and Clark Stoeckley, owner of the iconic WikiLeaks truck and courtroom artist, were similarly able to cover the Manning Trial at Ft. Meade with little more than horrible WiFi and administrative obstacles.

Who was Suzi Dawson involved with and what was she reporting that singled her out for targeting that rivals or surpasses that of everyone but detainees at GITMO?

According to her own account Suzi Dawson first contacted Birgitta on Twitter in 2012 and asked her to be one of the five women who supplied answers to the same series of questions.

As interesting as what Suzi Dawson reports is what she omits.
There's no coverage of NDAA lawsuit or primary challengers to

Obama Admin even when Suzi's "women warriors" were there.
Under no circumstances does this qualify as cause for targeting
in 2011 during the eight weeks Occupy Auckland existed.

By connection to known targets Dawson means communicated with or wrote about them. The inflated value of her contacts rivals Enron's balance sheet. For 2012 she has Kim Dotcom whose FBI raid made headlines around the globe and journalists of every stripe did extensive reporting. What sets her apart?

Suzi frequently claims to have “invented hashtags” including #MoT for Kim Dotcom's 2014 Moment of Truth event where Glenn Greenwald joined him in Auckland with Julian Assange by video to talk about the implication of Ed Snowden leak.

Did four videos with 143 views put a target on Suzi's back? In fairness 9 min of video from the closing of #MoT event is not Dawson's only source of association. She also has a 1min 2sec video where she asks Dotcom a question at the open invitation #SwimWithKim event launching Internet Party. She has a series of pics with attendees milling around the mansion grounds too.

Photo credit Suzette Dawson

The next pair of names are Nicky Hagar author of *Dirty Politics* about New Zealand political scandals and Martyn Bradbury who is named in the book. Dawson does have a dozen blogs about the book and scandals it exposes. They still live in New Zealand.

Any affiliation with Snowden can be viewed in the context of Dawson's claim his attorney Jesselyn Radack is also a supporter. Citing "big names" as backers of her work is an ongoing theme.

All the Timelines are from *Person of Interest* video she portrays as a “documentary” with evidence that made her a target of global intelligence and forced her to flee NZ in January of 2015. <https://web.archive.org/web/20191216041059/https://protectsuzie.com/tl3a.pdf> Including her own funding campaigns DecipherYou and #1vs5i that were launched years after leaving NZ is insulting at best. As always the use of high profile figures is designed to leverage their audience reach and add credibility to fund Suzi’s lifestyle.

Is characterizing her funding campaigns as lifestyle choices fair?

Let's look at the two years between fleeing New Zealand with her two young children and request for asylum in Moscow.

Before documenting her exotic luxury vacations let's check the international media sharing her work. Hashtags are a separate category in her *Person of Interest* that are addressed later. Both of the RT credits were for Anonymous 2014 Million Mask March in Auckland included with footage and pictures globally.

David Seaman's link to Suzi's solitary Trapwire piece is more interesting. Documents included in WikiLeaks Gfiles, leaked by Jeremy Hammond, were analyzed in anonops IRC where many researchers and journalists collaborated. Seaman was among those who were involved. The Trapwire - Cubic - Abraxas series inspired Anonymous street actions and produced volumes of pastebins detailing individuals in these corps and MIC alliances.

Suzi's "analysis" used pastebins made by antisecc to challenge a predictable whitewash of private spies by New York Times. She makes no mention of Anonymous as the source of analysis and did no reporting of additional findings or #OpTrapwire actions.

B

Links to research Seaman helped create is not an IBTimes credit.

Real fearless journalists like Violet Blue were in IRC doing the research work and reporting the ongoing findings in depth.

Back to Dawson's globe trotting starting with her Hong Kong trip in April 2015 just over 90 days after fleeing to Berlin. The unimaginable luxury she writes of hardly captures the typical experience of political refugees fleeing for their lives.

Dawson doesn't say how long she was in Hong Kong but does note that she spent six weeks in a luxury apartment in Malaysia.

We also know about trips to Kazakhstan and Belarus.

Suzi must have remembered her targeting narrative because she tweeted about tracking devices sewn into her clothes. They're in half the NYC clothing stores where garments are too expensive to use the ugly, large punch pin alarm tags discount stores use.

Anyone who has ever relocated or vacationed with young children needs to marvel at the ease with which this FiveEyes target manages to do such extensive traveling. Kids are high maintenance with groceries and laundry, doctors, dentists and

school. They need activities and play dates, homework help and bedtime stories which leaves any single parent scant free time.

This lends credence to the claim from members of Berlin Hacker Space, that Dawson has a full time nanny who tends to her kids.

During a vacation break Suzi scheduled herself for CCC workshop that's the basis for Person of Interest video.

“I must admit I hadn’t anticipated people would feel sheer terror when having **experiences of our media team** (and countless other PoI’s) recounted to them in a matter-of-fact fashion”

<https://suzi3d.com/>

Listening to emotionless Suzi drone on about assassination attempts is terrifying in the same way hearing a serial killer recount murders with no trace of feeling might be. If her goal is to dissuade folks from activism *Person of Interest* does the job. Screenshots below are just three minutes of purported ordeal.

<https://www.youtube.com/watch?v=1KaxGN9WgRU>

Despite the fact Occupy Auckland doesn't list her on the Media Team and Suzi devoted much effort in 2013 to accusing Penny Bright of an assortment of harassment, Dawson adds to her victimization with claims notorious snitch Sabu, the LulzSec hacker who entrapped Jeremy Hammond, was then used by the FBI to seduce Suzi to get a heads up about her writing. She misses the irony that NSA capture every keystroke and she cites writing about the Surveillance State made her a prime target. Suzi reports her activism began in November 2011. After 14 months she spent 12 hours a day online playing World of Warcraft. She is the only single mom that's ever crossed my path

who has that kind of free time much less for online gaming.

Suzi published this piece the same day Sabu was a featured speaker at the Suits and Spooks conference in New York City. She frequently cites this in her other writing as evidence she was an FBI target. The story has more holes than Swiss cheese but it merits attention because it is by far Dawson's most popular.

It's believable Suzi spent 12 hours a day masturbating online with someone who looks like Sabu. It's a preposterous notion that a hacker used to infiltrate Anonymous was tasked to spend 12 hours a day online with Suzi Dawson of Occupy Auckland to learn about her reporting. Hackers will hack to get information. Suzi touts her support of WikiLeaks from 2010. How did global headlines about Sabu miss her attention in June 2012? LulzSec's hacking spree and Hammond's arrest were epic in the history of WikiLeaks. It's where Suzi's "Trapwire scoop" came from. It's not hard to find examples of fraud and fabrications in Suzi's reporting. The examples are endless and there are several

sources online who have delved into details far more deeply.

What's of greater concern is the pattern of deception and destruction that follows her and real questions about what her real objectives are. Look at the tweet below she posted two days before the pictures of Sabu made global headlines.

Jackyl was the original owner of @YourAnonNews Twitter account which he still controlled in 2012. His girlfriend Emmy @eismc2 and best friend @kallisti were constant fixtures in anonops IRC as were @ghostpickles and @der_bluthund.

Tweeting that group list in a reply to Jackyl with <3 says Suzi was plugged into what was happening inside Anonymous IRC.

Any mention of anonymous is a glaring omission in Suzi's body of work and the question becomes why does she pretend not to know anything about the hactivist community?

Suzi never supported FreeAnons, not the events or fund raisers or anyone of the two dozen arrested and faced with hacking charges. It wasn't until Lauri Love became a quasi-celebrity, as

an official spokesman for Julian Assange, that Suzi showed any interest at all in the ordeal Laurie faced.

How did the worst interviewer in the world with zero hosting experience leap from obscurity to host the vigils the minute Julian's internet connection was cut leaving him voiceless? Dawson only had 3,026 Twitter followers despite all her boasting of high profile supporters sharing her work. Yet she ushered in the most high profile, divisive and destructive chapter in the decade long WikiLeaks support movement.

Suzi introduced #JA4Me and #Unity4J hashtags that caused massive confusion and undermined longstanding #FreeJulian #FreeAssange and #FreeJulianAssange traffic volumes.

More divisions were created by her efforts to reclassify Julian as a whistleblower and muddle his clear role as a publisher. Her penchant for sh*t stirring created rifts and resentment as they did with Pursuance Project and collapse of the Internet Party.

Suzi never organized an event in her life so what forces are behind her building her status and a roster contacts?

Suzi has used her expanded status to promote herself as an authority on WikiLeaks and arbiter of truth. One glance at the swill she's churning out should give everyone who knows better serious cause for concern.

Take her three part series called freeing Julian Assange that has little to do with Julian's freedom and distorts WikiLeaks history.

<https://web.archive.org/web/20190608022747/https://contraspin.co.nz/freeing-julian-assange-part-one/>

Not once in all her writing does Dawson mention Mike Ratner who was probably the most powerful advocate for WikiLeaks, Julian Assange and Chelsea Manning as founder of Center of Constitutional Rights and tireless campaigner against legal abuses. Mike Ratner was at the Manning Trial and showed up for every Jeremy Hammond Press event as well as court dates.

Mike Ratner memoir

<https://www.rt.com/shows/on-contact/514073-civil-rights-attorney-memoir/>

How did Dawson come to cast Trevor Fitzgibbon and obscure PR player on the Manning campaign as one of three pillars of WikiLeaks when Nathan Fuller was the most active driver of FreeManning campaigns?

What happened to Gavin MacFayden and Sarah Harrison and the long list of journalists and technologists who collaborate? Where's the concern for liberating evidence of CIA criminality?

It's been five years since Dawson applied for asylum in Russia and she still does not have it. Why isn't that a priority instead of launching yet another campaign that siphons support from the battle for Julian's freedom under the guise of a greater good?

What happens to PanQuake supporters when it's exposed as a fraud or goes bust because Dawson has moved on, money raised is gone and PanQuake is one million dollars short of making anything that functions? Suzi values exposure above all.

***** **RELEVANCE NOTICE** *****

Everything beyond this point is interesting but redundant examples of exaggerations and fabrications, body of work and “Occupy Media” timelines plus random references.

Like the politicians and media presstitutes we all know, you reach a point where the details change but the story’s the same.

Additional information is included because weeks of research effort is a terrible thing to waste and maybe individuals in the future can use some of the material for an accurate portrayal.

Only two tweets show up for #OilFreeSeas my guess is Dawson added it because Greenpeace appears in GCSB list of groups targeted and she's desperate to prove she's somehow connected to the list of 88 NZ targets.

Thanks Occupy Media she was NOT part of with multiple
Twitter accounts and her assorted blogs for cross-posting

Suzi has glowing credits for Mint Press News “publishing”
her work but it is posted in a blog with attribution
disclaimer.

Daily Blog NZ is another open posting site here she lists PR
for a public event as three different articles. Any opportunity
to connect herself to what she calls “big names” is exploited.

Mainstream Press

Suzi lists Occupied NZ Herald as one of her media creations is a paper.li tweet aggregator not what NYC OWS published.

#Trapwire Suzi debunks w no attribution for Anonymous pastebins it's noted as "dox" as if it's like Wikipedia.
